

Vision for a Sustainable Future

Salamander Early Education is a unique community hub of lifelong learners growing in sustainability educational excellence. We care unconditionally for each other, our environment and the future we are creating for our children.

Our commitment to our children is to educate them with heart and courage. To empower them with the knowledge to thrive. To engage them in their world and foster love and appreciation for the natural world. To explore their concerns and ignite their passions. Learning together, we can advocate as global citizens for a better world. We are bold enough to challenge and brave enough to change past habits.

Every day we actively contribute to make our community a better place to live, work and play for all, people, plants and wildlife. We acknowledge the Worimi people the first custodians of Port Stephens, we thank them for looking after the land that we are honoured to work play and grow on today. We recognise the cultural practices used by First Nations peoples; practices that have been used for thousands of years to sustain Australia.

Rethink, Refuse, Reduce, Reuse, Reflect and Recycle are daily actions that resonate in all aspects of our operations.
